

MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and
Atmospheric Administration/National Environmental
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: SEPTEMBER 27, 2011

REPORT TIME: 2355Z (1855 CDT)

ANALYST: SHEFFLER

DATA SOURCE: MODIS TERRA

MODE: MULTI-SPECTRAL

RESOLUTION: 250 METERS

IMAGE DATE/TIME: 9/27/2011 1630Z (9/27/11 1130 CDT)

Legend

-  Possible Oil
-  False-Positives (not oil)
-  Center Point of Oil Slick:
[27°16'28" N / 84°29'31" W]

REMARKS:

An area of possible oil is seen in this MODIS Terra image from today about 117 miles southwest of Clearwater, FL. The area measures approximately 6 miles in length and could be the remains of oil referenced in the 9/22 MPSR for this region. This possible area of oil is approximately 51 miles southeast of the oil seen on 9/22 and seems reasonable given the northwest to southeast currents during that time.
