

MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and
Atmospheric Administration/National Environmental
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: APRIL 25, 2012
REPORT TIME: 2315Z (1815 CDT)
ANALYST: VOGT

DATA SOURCE: SPOT-4
MODE: MULTI-SPECTRAL
RESOLUTION: 20 METERS
IMAGE DATE/TIME: 04/25/12 1555Z (1055 CDT)

Legend

-  Possible Oil
-  False-Positives (not oil)
-  Suspected Point Source:
[28°48'36" N / 89°47'17" W]
-  Known Platforms

REMARKS:

A suspect anomaly is visible southwest of Louisiana's Bird Foot region. This slick is located in close vicinity to multiple known platforms. The anomaly, which extends about 1.5 miles to the north, is likely originating from a platform at its southern end because surface winds are directed to the northeast in the region.
